CONTENTS

8 **AISI review: the year past and the year ahead** M. Deaner

31 **Packed bed reduction of iron ore fines by coal fines: effect of operating variables** R. Haque, H. S. Ray, and A. Mukherjee

36 **Behaviour of unburnt pulverised coal in blast furnace** Y. Iwanaga

45 **Reduction of converter slag in electric arc furnace** M. Dziarmagowski, M. Karbowniczak, M. Pyzalski, and J. Okoń

50 **Steelmaking related aspects of water atomised iron powder** J. E. Peterson and W. M. Small

55 **Mathematical model of single roll strip caster based on microscopic heat balance** M. K. Anjan Kumar and S. P. Mehrotra

64 ***Technical Note*** **Effect of nitrogen bubbling in ladle on inclusions growth** M. R. Ghomashchi and I. Murgas

66 **Rebuild and blow-in of Keihin no. 1 blast furnace** A. Shimomura, K. Kimura, B. Iino, S. Kishimoto, and R. Nakajima

75 **Ironmaking developments and practice at Kwangyang Works, POSCO** C. O. Kang and R. N. Younger

93 **IISI panel discussion: the outlook for energy (oil and gas, coal, electricity)** P. D. S. Hadfield, R. H. Quenon, and C. Lewinter

98 **Energy use and management in British Steel plc** F. Fitzgerald

111 **Formation and morphology of iron silicate 'iscorite'** J. Smuts

120 **Oxy-coal injection at Cleveland Ironworks** D. A. Campbell, G. Flierman, G. Malgarini, and R. B. Smith

127 **Carburisation of directly reduced iron during reduction of iron ore fines by coal fines** R. Haque, H. S. Ray, and A. Mukherjee

131 **Effect of mix composition and sintering technology on strength of superfluxed sinters produced from Itakpe iron ore concentrates** S. I. Okeke

136 **Comparison of iron desulphurisation using calcium carbide and lime–magnesium mixtures** G. A. Irons and C. Celik

145 **Thermodynamics of nitrogen in $BaO–Al_2O_3$ and $BaO–SiO_2–Al_2O_3$ melts** T. Kozono and H. Suito

152 ***Technical Note*** **Heat and mass transfer rates between solid and liquid in gas stirred ladle systems** D. Mazumdar, N. Kumar, and V. Verma

168 ***Keynote address*** **Powertrain design: the future** R. D. Stone

173 ***Keynote address*** **Automotive body design: the future** G. G. Sked and D. Saddington

183 **The COREX process** H. M. W. Delport

190 **Non-isothermal and isothermal reduction kinetics of iron ore agglomerates** S. Paul and S. Mukherjee

194 **Reduction of iron ore pellets in $CO–CO_2–H_2–H_2O$ mixtures** M. J. Proctor, R. J. Hawkins, and J. D. Smith

201 **Use of optical basicity concept for determining phosphorus and sulphur slag–metal partitions** R. W. Young, J. A. Duffy, G. J. Hassall, and Z. Xu

221 **Flow behaviour and filtration of steel melt in continuous casting tundish** Liu Xintian, Zhou Yaohe, Shang Baolu, and Jiang Weiming

226 **Energy exchanges during vacuum arc remelting** A. Jardy, L. Falk, and D. Ablitzer

233 ***Technical Note*** **New steelmaking technology based on coal, natural gas, and oxygen** S. P. S. Sabharwal and A. Ganguly

251 ***IoM Presidential address*** **Materials and economic prosperity** J. Collyear

263 **Materials requirements of the automotive industry** E. M. Rowbotham

268 **Materials aspects of the automobile and the environment** C. Razim

277 **Steels for automotive industry** A. L. Vickers

285 **Steel developments for improved fatigue resistance in suspension springs** E. Smart, W. T. Cook, and A. Ellis

290 **Valve materials and design** G. N. Beddoes

297 **Attaining automotive quality on new galvanising line at Sollac Florange** J. P. Lahouste

302 **New hot metal desulphurisation plant at Unimétal Gandrange: first results** G. Jacob, Y. Sondag, and A. Oskamp

306 **Use of physical and numerical simulation methods to characterise gas flow in trielectrode electric arc furnace** P. Gardin, C. Soide, A. Dez, and I. Guillaume

311 **Development of sinter structure and correlation with its magnetic susceptibility for different basicity indices** M. T. Larrea, A. Formoso, M. Sirgado, A. Gutiérrez, P. P. Gómez, and A. Cores

333 *Keynote address* **Trends in demand for and supply of coal and coke** D. F. Anderson

337 *Keynote address* **Organisation and training of coke oven management** T. Okunishi

341 *Keynote address* **Coke in the USA: capital investment and needed capacity for the 1990s** W. T. Hogan

357 *Keynote address* **Future development in cokemaking technology – a European view** G. Nashan

364 *Keynote address* **Future technical developments – a Japanese view** M. Tateoka

372 **Composite prereduced pellet – new feed for iron and steel industry** T. Sharma

377 **Mixing in liquid baths by gas injection** G. G. Krishna Murthy and S. P. Mehrotra

390 **Microstructural and morphological changes of silica and chromite packing sands for sliding gate system for steel ladles after heating at temperature** H. C. Pan and Y. C. Ko

394 **Design of air–water mist jet nozzle** S. C. Koria and I. Datta

402 **Influence of specimen dimension and grip in tensile testing steel to EN 10 002** T. G. F. Gray and A. McCombe

449 *Keynote address* **Progress in pollution abatement in European cokemaking industry** R. Fisher

457 *Keynote address* **Developments in inclusions control and their effects on steel properties** T. Gladman

464 **Kinetics of gasification of carbon and carbothermic reduction of iron oxide** P. Tiwari, D. Bandyopadhyay, and A. Ghosh

469 **Direct reduction of iron ore using iron bath offgases** M. Motlagh

479 **Mathematical modelling of transport phenomena in continuous casting tundishes: Part 1 Transient effects during ladle transfer operations** S. Chakraborty and Y. Sahai

488 **Mathematical modelling of transport phenomena in continuous casting tundishes: Part 2 Transient effects owing to varying ladle stream temperature** S. Chakraborty and Y. Sahai

495 **Effects of boron protection methods on properties of steel** M. Paju

501 *Technical note* **Physical modelling validation of computational fluid dynamics code for tundish design** J.-L. Yeh, W.-S. Hwang, and C.-L. Chou
